

Company Profile

SMA Solar Technology AG

Energy that Changes

As a leading global specialist in photovoltaic system technology, SMA is setting the standards today for the decentralized, digital and renewable energy supply of tomorrow. More than 3,000 SMA employees in 18 countries have devoted themselves to this task. Our innovative solutions for every type of photovoltaic application offer people and companies worldwide greater independence in meeting their energy needs. In collaboration with our partners and customers, we are helping people transition to a self-sufficient, decentralized and renewable energy supply.

For 40 years, SMA has been setting technological trends and driving the development of renewable energies. With our groundbreaking inverter technology, we have made significant contributions in seeing that renewable energies leave the pioneer phase behind and increasingly become the norm worldwide.

With the digitization of the energy industry, we are now entering the energy world of the future. Photovoltaics are playing an important role, given that they are already the most cost-effective energy source in nearly all regions.

To exploit their full potential, we will need to connect photovoltaics with storage, e-mobility and other sectors and integrate them into the entire system. Here, SMA has a key role to play. Our vast experience and comprehensive expertise make us a sought-after partner for leading companies from other areas. Today, SMA is developing sophisticated system solutions perfectly tailored to the needs of the "electricity prosumers" of tomorrow.

Since 2008, SMA Solar Technology AG has been listed on the Prime Standard of the Frankfurt Stock Exchange (S92) and is listed in the TecDAX index. Our technology has won multiple awards and is protected by more than 1,600 patents and utility models.
